

How to Size & Design Your Stage Backdrop design for Live session on Airmeet.com

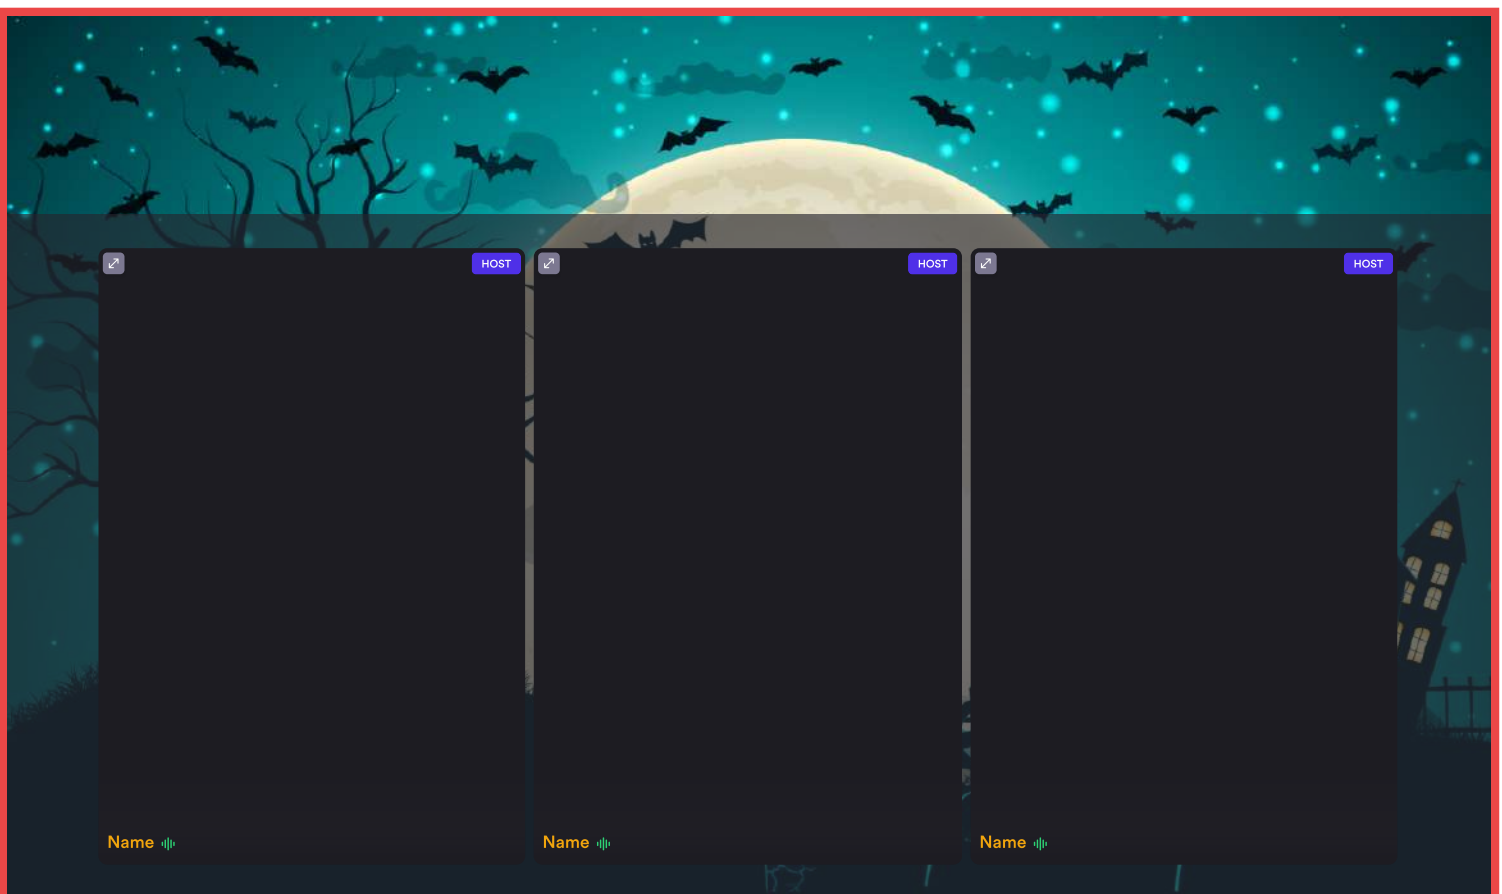

Airmeet Stage Backdrop design size

Optimize your backdrop design for the right dimensions: 1868 pixels wide and 1328 pixels tall, which includes visible area for 1868px X 280px where you can put your event details, sponsors logo, branding elements, etc. as per your convenience. If your uploaded image is smaller than these dimensions, Airmeet will stretch it to cover stage -- making it look blurry.

Dont's

Do make sure your backdrop design size is right, and all visible elements are only placed in visible area.

In the above image, only area which does not have black overlay will be visible to everyone, hence you can place visible text or image on the top.
